DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: ✓

The Prior Art does not fairly teach or suggest the claimed apparatus (and corresponding method) for indicating an apparent error in the operation of a fluid powered thread-forming attachment mounted on a machine tool for controlled movement toward and away from a workpiece upon which a thread is to be formed, having the combination of a fluid-powered actuator for selectively moving the thread-forming attachment relative to the workpiece during a thread-forming cycle; a sensor operatively arranged to monitor the pressure of fluid within the actuator during at least a portion of the cycle, and to provide an output signal; a programmable logic unit provided with the sensor output signal, arranged to store minimum and a maximum permissible fluid pressure values expected during the cycle, and operatively arranged to indicate an apparent error in the formation of a thread on the workpiece if the pressure determined by the sensor is not between the stored minimum and maximum values.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
